

Clinical impact of the pro-healing stent

Chairperson: Germano di Sciascio

Objectives:

- To understand the impact of a stent designed to heal the stented artery
- To review the effect of the healing stent on restenosis and stent thrombosis

Endothelial progenitor cells functional importance for accelerated natural healing - **Jonathan Hill**

Healing stents in patients with acute myocardial infarction -
Huay Cheem Tan

Patients who cannot be on dual-antiplatelet therapy - **Michael Kutryk**

Genous stent in real-world experience and randomised pilot study -
Robbert de Winter
